Wendy Isdell's "A Gebra Named AI" is a very enjoyable and entertaining trip through the Land of Mathematics. She brings many ideas from math and chemistry to life in creative ways, cementing these concepts in the mind of the prepared reader along the way. This book, and its sequel "The Chemy Called AI," are most accessible to the reader who already has a foundation in math and chemistry.

Book Review-"a Gebra Named AI" | Researchomatic

She suddenly is in a feild full of zebra looking animals with equations written all over them. She then learns that those animals are called gebras. She also becomes 'friends' with a gebra named AI. AI decides to take her to the Main Gebra.

Winner of multiple awards for educational fiction as well as quality fantasy, this charming story brings us the adventures of Julie in the Land of Mathematics. Julie is a young teen who struggles with her homework, especially math, until a mysterious Imaginary Number leads her into Mathematics. There she meets Al the gebra (who is like a zebra), and horses who represent elements on the Periodic chart. She sets off on a quest to find her way home, and in the process, learns the foundations of algebra and chemistry. Join Julie in her journey through Mathematics, where the Orders of Operations are actual places and chemistrees are real plants with atomic fruit. Will Julie ever get home? Written when the author was age fourteen, this work of fiction has been used in various school systems throughout the U.S to help supplement cross-curriculum learning. It can also be enjoyed as light fantasy reading.

"When her reading light goes out, Julie opens a mysterious portal to the land of Science, where she discovers that Tungsten the rogue Periodic has been making trouble" -- T.p. verso.

Winner of several awards for both fantasy and education, A Gebra Named Al has been acknowledged nationwide as both an enjoyable tale and a tool for helping teach young adults the fundamentals of algebra and chemistry. The story was written when the author was 14 years old. Julie struggles with homework until a mysterious Imaginary Number leads

her into the Land of Mathematics. There she meets Al the gebra (who is like a zebra), and horses who represent different elements. In the process, she learns the foundations of algebra and chemistry. Join Julie in her journey through Mathematics, where the Orders of Operations are actual places and chemistrees are real plants with atomic fruit. Will she ever get home?

Julie keeps getting the wrong answer to what looks like a simple problem: $-5+3(6)$. Frustrated, she gives up, rests her head on her book ... and is awakened by an Imaginary Number who suddenly appears in her room. When she follows the Number through a mysterious portal, she enters a strange land where she meets a zebra-who's really a gebra-named Al. Join Julie on her adventures in the Land of Mathematics, where the Orders of Operations are real places and fruits that look like Bohr models grow on chemistrees. With Al and his friends-scientific "horses" representing elements and their isotopes-Julie travels to the Mathematician's Castle for help finding her way back home. Their journey is full of surprises that make math and science interesting and fun.
