This third edition laboratory manual was written to accompany Food Analysis, Fifth Edition, by the same author. New to this third edition of the laboratory manual are four introductory chapters that complement both the textbook chapters and the laboratory exercises. The 24 laboratory exercises in the manual cover 21 of the 35 chapters in the textbook. Many of the laboratory exercises have multiple sections to cover several methods of analysis for a particular food component or characteristic. Most of the laboratory exercises include the following: background, reading assignment, objective, principle of method, chemicals, reagents, precautions and waste disposal, supplies, equipment, procedure, data and calculations, questions, and references. This laboratory manual is ideal for the laboratory portion of undergraduate courses in food analysis.

### Health Sciences & Nutrition

The general aim of this book is to present a practical, case-orientated approach to the analysis of acid-base problems in the clinical setting. Medical students, residents, fellows and attendings will find the book a required addition to their medical library.

This edition of Basic Skills in Interpreting Laboratory Data, 4th Edition is a case-based learning tool that will enhance your skills in clinical lab test interpretation. It provides fundamentals of interpreting lab test results not only for pharmacy students, but also for practitioners as an aid in assessing patient drug-treatment responses. It is the only text written by and for pharmacists and provides case studies and practical information on patient therapy. Since the publication of the third edition, much has changed—in the clinical lab and in the hospital pharmacy. Consequently, the new fourth edition incorporates significant revisions and a wealth of important new information. NEW TO
