Preliminaries: Two-Sector Models • 3 not need to occur: instead, we can have relative demand intersect one of the flat seg-ments of relative supply, so that the equilibrium price with trade the autarky equals price in one country.1 Focusing on the case where ppaa p), we can go back to the PPF of each country and graph the production and consumption points with free trade.

~~Preliminaries: Two-Sector Models—Princeton University~~

It builds on David Ricardo's theory of comparative advantage by predicting patterns of commerce and production based on the factor endowments of a trading region. The model essentially says that countries export products that use their abundant and cheap factors of production, and import products that use the countries' scarce factors.
