[MATH1510 Financial Mathematics I](#)

Thus $PV = P(1+i)^n = P(1+i)^n$: This is known as the present value or discounted value of P. One can think of it this way. Suppose you have to make a payment P, which must be made n time in the future. The present value of P is the money you need to deposit in the bank now in order to have enough money to pay the amount P after n time periods, taking into account ...
