As used in classical sociological theory, the concept of modernity has its roots in the attempt to come to grips with the meaning and significance of the social changes occurring in Europe in the latter half of the nineteenth century, namely, the effects of industrialization, urbanization, and political democracy on essentially rural and autocratic societies.

Social Change and Modernity

In the field of philosophy, premodern beliefs yielded to modern dismay about how social systems determine a great deal of life experience for any one individual. German philosopher Friedrich Nietzsche proposed that modernity is typified by crises in systems of morality, so that once belief is lost, there can be no restoration. He also noted that many of these crises in self-perception occur because of advancements in knowledge and an uncritical embrace of new technologies.

The meaning of 'theory' As a term of art, 'social theory' is a distinctly recent invention. No such term exists in English or in any other language before the twentieth century, and even in the twentieth century it is not common before about the 1940s. Auguste Comte coined the term sociology in France in the 1840s, but 'sociology' too did not gain widespread currency as a term.
