Shakespeare famously wrote that some men are born great, some achieve greatness, and some have greatness thrust upon them. Part military history and part group biography, *Generals in the Making* tells the amazing true story of how George Marshall, Dwight Eisenhower, Douglas MacArthur, George Patton, and their peers became the greatest generation of senior commanders in military history. As the U.S. Army's triumphant homecoming from World War I was quickly forgotten amidst two decades filled with economic depression and growing isolationism, Marshall, Eisenhower, MacArthur, Patton, Omar Bradley, Lucian Truscott, Matthew Ridgway, and their brothers in arms toiled in a profession most Americans viewed with distrust. Before they became legends, these young officers served their country in posts from Washington D.C. to Panama, from West Point to war-torn China. They taught and studied together in the Army's schools, attempting to innovate in an era of shrinking budgets, obsolete equipment, and skeletal forces. Beyond these professional challenges, they endured shattering personal tragedies: the sudden deaths of children or spouses, divorce, depression, and court martial. Yet when the world faced possibly its darkest hour, as fascism and barbarism were on the march, they stood ready to lead America's young men in the fight for civilization. By the end of World War II, even German commanders expressed amazement at the dynamic change in American military leadership since the Great War. *Generals in the Making* is the first comprehensive history of America's World War II generals between the wars, an invaluable prequel to every history of that war.

Generals and Scholars is the first work in English to examine fully military rule during the Koryo. Although it lasted for only a century, the period was one of dynamic change--a time of institutional development, social transformation, and the reassertion of the civil service examination and Confucian ideology coupled with the flowering of Son (Zen) Buddhism. (When confronted with fundamental matters of rule, however, Ch'oe leaders frequently opted for the status quo and in the end aligned with many traditional civil elites to preserve their power.) The traditional tension between civilians and the military was eased as both came to accept the primacy and necessity of civilian values. Koryo generals, unlike those in Japan, learned they could govern more readily by relying on civil leaders administering a strong central government than on a call to arms. Institutional innovations from this period survived well into the next and Son Buddhism continued to flourish throughout the country.
