*Python Bootcamps: Learn Python Programming and Code ...*

Python is an easy to learn, powerful programming language. It has efficient high-level data structures and a simple but effective approach to object-oriented programming. Python's elegant syntax and dynamic typing, together with its interpreted nature, make it an ideal language for scripting and rapid application development in many areas on most platforms.

*The Python Tutorial — Python 3.9.0 documentation*

Yes, the most obvious reason for most of the beginner learning Python is the simplicity to learn because of its syntax. If we compare the Hello World program in both these languages then in Java you have to write around 3-4 lines to print a single statement while in Python you can do this in just 1 line.
