The W4 was Wisconsin's answer to the EPA. Early W4's had updated valve seats, valve guides, manifolds and carburetor. Later W4's were electronically controlled and had sequential multiport fuel injection. The electronic W4s are quite rare, I have only ever seen two of them. I assume you have a carbureted W4.

I did some looking on line and the W4-1770 should use a Wisconsin filter number RV52 and NAPA crosses that to a NAPA 1051 or if you want a longer version a 1050 and the RV52 does go to a Baldwin BT341 Not that it is of any help to you but my local NAPA store shows 2 of the 1051 filters in stock!
