delivery. A review of this book by Barry Sturman appeared in Issue 10 of the Journal of Pyrotechnics, Winter, 1999. Titles and Abstracts (Part 3)

This is a collection of previously published technical papers that appeared in the Proceedings of the International Pyrotechnics Seminars from 1985 to 1994. The articles have been reformatted and laser reproduced. Many of the figures have been improved. Hopefully, the scientific information presented in these papers will prove to be useful to the reader.

A collection of previously published technical papers that appeared in various publications between 1978 and 1995. The articles were translated into English, reformatted and laser reproduced. Many of the figures have been improved. Hopefully, the scientific information presented in these papers will prove to be useful to the reader.

Dr. Shimizu translated his 1959 PhD thesis from Japanese to English. This is a mathematical and physical approach to the construction of spherical fireworks shells. The test results are tabularized and graphed in many instances.

Download Ebook Selected Pyrotechnic Publications Takeo Shimizu

This book is a compilation of four previously published collections of articles by Dr. Takeo Shimizu. The first volume contained a number of papers that Dr. Shimizu had presented at various International Pyrotechnic Symposia. The second volume contained articles that had been translated into English by the Canadian Explosives Research Lab. The third volume contained a collection of articles on firework colored-flame compositions that Dr. Shimizu had translated into English. The fourth volume contained Dr. Shimizu's PhD Thesis, The Design Criteria for Chrysanthemum Shells that Dr. Shimizu had translated into English. There is also a short autobiography that is based on an article written by Craig Villeneuve for the New Hampshire Pyrotechnics Association Newsletter in March, 1991. The article was edited and revised slightly by Dr. Shimizu, who also added a photograph of himself as a young man.

These are a collection of previously published technical papers on a variety of pyrotechnic topics. The articles have been reformatted into a 2-column, 8 1/2x11" format with medium print. Only those articles that continue to be of interest and use to pyrotechnicians have been included.
