Spazio Terra - Home | Facebook

«Il volo United 826 ha superato il limite di autorizzazione e i confini dello spazio aereo assegnatogli dal controllo del traffico aereo. Un fattore che ha contribuito è stato l'alto tasso di velocità del DC-8 della United durante l'avvicinamento all'intersezione Preston, insieme al cambio di spazio che ha ridotto la distanza lungo la rotta Victor 123 di circa 11 miglia.»

Collisione aerea di New York del 1960 - Wikipedia

Il David N. Dinkins Municipal Building, noto come Manhattan Municipal Building, è un edificio di 40 piani, alto 180 m, situato a Manhattan, New York. La struttura fu costruita per soddisfare le crescenti richieste di spazio governativo dopo il consolidamento del 1898 dei cinque distretti della città, con la costruzione che iniziò nel 1907 e continuò fino al 1914.

This Step 2 Step into Reading leveled reader with stickers is based on Disney and Pixar's Luca--in theaters June 18th, 2021! Set in a beautiful seaside town on the Italian Riviera, Disney and Pixar's original feature film Luca is a coming-of-age story about one young boy experiencing an unforgettable summer filled with gelato, pasta and endless scooter rides. Luca shares these adventures with his newfound best friend, but all the fun is threatened by a deeply-held secret: they are sea monsters from another world just below the water's surface. Directed by Academy Award® nominee Enrico Casarosa (La Luna) and produced by Andrea Warren (Lava, Cars 3), Luca opens in theaters June 18, 2021. Girls and boys ages 4 to 6 will love this Step 2 Step into Reading leveled reader featuring two sheets of bonus stickers. Step 3 readers feature engaging characters in easy-to-follow plots about popular topics. For children who are ready to read on their own.

This book, based on authoritative sources and reports, links environmental communication to different fields of competence: environment, sustainability, journalism, mass media, architecture, design, art, green and circular economy, public administration, big event management and legal language. The manual offers a new, scientifically based perspective, and adopts a theoretical-practical approach, providing readers with qualified best practices, case studies and 22 exclusive interviews with professionals. A fluent style of writing leads the readers through specific details, enriching their knowledge without being boring. As such it is an excellent preparatory and interdisciplinary academic tool intended for university students, scholars, professionals, and anyone who would like to know more on the matter.

This book investigates how arts-based research methods can positively influence people's resilience and well-being, particularly in constraining environments. Using examples from arts-based research methods in different contexts and from across the globe, the book brings together a diverse range of

perspectives to understand how both resilience and well-being can be supported in a world that is rarely stress free. Collectively they demonstrate how arts-based research methods can: provide agency through the foregrounding of participants' voices; afford transformational learning opportunities; create opportunities for relationship building; support creativity and new ways of thinking; generate aspirations and hope; encourage forms of communication that expose ideas, emotions and feelings that previously might not have been known or known how to be expressed; and enhance reflection and reflexivity. The authors explore how art-based practices, such as clowning, collage, dramatisation, drawing, painting, role-play and sculpting, can be used to support the resilience and well-being of individuals and groups across the lifespan, and theorize how arts-based research methods can positively contribute to participants' positive self-esteem, self-image and ability to cope with challenges and new circumstances. Academics, professional learning facilitators, higher education students, and anyone interested in resilience and well-being in the health and education sectors will find this an interesting and engaging text.

This book argues for a theory of mobile mapping, a situated and spatial approach towards researching how everyday digital mobile media practices are bound up in global systems of knowledge and power. Drawing from literature in media studies and geography - and the work of Michel Foucault and Doreen Massey - it examines how geographical and historical material, social, and cultural conditions are embedded in the way in which contemporary (digital) cartographies are read, deployed, and engaged. This is explored through seventeen walking interviews in Hong Kong and Sydney, as potent discourses like cartographic reason continue to transform and weave through the world in ways that haunt mobile mapping and bring old conflicts into new media. In doing so, Mobile Mapping offers an interdisciplinary rethinking about how multiple translations of spatial knowledges between rational digital epistemologies and tacit ways of understanding space and experience might be conceptualized and researched.

This book approaches cultural landscape as a driver for societal challenges, economic development, social inclusion, place assessment and heritage conservation. It explores issues stemming from the relation between conservation and emergencies, and identifies descriptive tools for conveying knowledge and generating new expertise, heritage skills, seismic culture and social resilience. The documentation of landscapes, due in part to new technologies, increasingly involves integrated methodologies and graphic outcomes such as Heritage-BIM, advanced 3D modeling, and immersive environments. According to recent UNESCO recommendations, the process of mapping places is a necessary prerequisite for design action, and also includes the emotional and perceptive dimension, so as to represent space through visual thought and produce graphic materials. The chapters presented here will ultimately support efforts to overcome the emergency phase of reconstruction after natural disasters and, by exploring relevant issues in recent studies, will describe emerging tools that can help inspire practices that concern not only agrarian and urban, but also historic urban landscapes. The work also presents planning tools to help preserve the integrity and authenticity of urban heritages. The book will benefit all scholars and practitioners who are involved in the process of understanding, designing and transforming places, and will foster an international exchange of research, case studies, and best practices to confront the practical challenges involved in keeping cultural landscapes alive.

Neil deGrasse Tyson's #1 New York Times best-selling guide to the cosmos, adapted for young readers. From the basics of physics to big questions about the nature of space and time, celebrated astrophysicist and science communicator Neil deGrasse Tyson breaks down the mysteries of the cosmos into bite-sized pieces. Astrophysics for Young People in a Hurry describes the fundamental rules and unknowns of our universe clearly—and with Tyson's characteristic wit, there's a lot of fun thrown in, too. This adaptation by Gregory Mone includes full-color photos, infographics, and extra explanations to make even the trickiest concepts accessible. Building on the wonder inspired by outer space, Astrophysics for Young People in a Hurry introduces an exciting field and the principles of scientific inquiry to young readers.

Traces the history of dinosaurs, as well as the development of paleontology. Dinosaurs from all the major groups are described as well as some of the winged reptiles and sea creatures that shared the dinosaurs' world.
